Announcement Columbia University Irving Medical Center Funding for Faculty Recruitments from Underrepresented Groups Fall 2020

Introduction

The Office of the Dean of the Faculties of Health Sciences and Medicine is pleased to provide this announcement of support for faculty recruitments from groups underrepresented in the professoriate. This program is designed to support Schools' diversity plans, and to assist the University in meeting placement goals established in its affirmative action programs, by advancing the recruitment of outstanding minority and women scholars in disciplines where their availability exceeds their representation on our faculty. Our goal is that the composition of our tenured and tenure-track faculty more closely reflects the national pool of qualified candidates. Please note that the program is not intended to increase the size of the faculty above the current plans of your School. Rather, the goal is to accelerate the recruitment of faculty from underrepresented groups.

The program has two elements:

1. Standard Search Recruitments

Schools may request funding support to assist in the recruitment of candidates identified through standard searches from groups whose availability exceeds their representation on the faculty (see *Appendix 3*). The level of support provided will be predicated on the assumption that, since there was a Standard Search and Evaluation process, this was a planned recruitment for which the Departmental/School had funds already budgeted. The scope of commitments and application process for Standard Search support are detailed in *Appendix 1*.

2. Target-of-Opportunity Recruitments

While Departments/Schools will normally use the procedures described in their Standard Search and Evaluation Procedures to recruit faculty members, a hiring unit may seek a waiver from these procedures for some types of recruitments. If the candidate in question is an outstanding woman or minority scholar, whose successful recruitment would bring the composition of the unit's faculty into closer alignment with the composition of the national pool of qualified candidates, then the unit may apply for a waiver, and also seek funds from CUIMC (depending on the unit that will support the recruitment). *Appendix 2* details the scope of commitments and application process for Target-of-Opportunity support.

The application deadline is **Wednesday, October 21, 2020**. For this round of applications, we anticipate having funds for approximately five (5) target-of-opportunity recruitments, on the Medical Center campus. The next application deadline will be in the spring 2021 semester.

Application Process

Given the limited amount of CUIMC funding for both standard search and target-of-opportunity recruitments for faculty members from underrepresented groups, schools are strongly encouraged to develop a process for determining which funding requests will be prioritized and put forward. Departments requesting support should coordinate closely with their Deans. Funding requests must be submitted with the support and sign-off by the School's Dean.

Eligibility and Application Requirements

Funding application requirements, the application process, and the scope of CUIMC funding commitments are detailed in the appendices: Standard Search in *Appendix 1*; Target-of-Opportunity in *Appendix 2*.

CUIMC will only consider providing support for candidates being recruited as full-time tenured or tenure-track faculty members. Candidates must belong to a group eligible for support, as indicated by *Appendix 3*.

Review Process and Selection Criteria

Standard Search Recruitments. In recognition of the time urgency usually associated with standard search recruitments, requests for support will be accepted and considered on a rolling basis. A committee appointed by the Dean of the Faculties of Health Sciences and Medicine will review the applications and will make recommendations to the Dean of the Faculties of Health Sciences and Medicine. Hiring units should expect a turn-around time of approximately 3 weeks.

Target-of-Opportunity Recruitments. The application deadline is **Wednesday, October 21, 2020**. A committee appointed by the Dean of the Faculties of Health Sciences and Medicine will review the applications and will make recommendations to the Dean of the Faculties of Health Sciences and Medicine. Notifications will be made in November. The next application deadline will be in the spring 2021 semester.
